Berlin, 30.03.2015

Reference for Elena Petkova

Elena Petkova worked in our office from December 1st 2012 to December 31st 2014. Due to her master studies she reduced her full time internship in the period of October 1st until December 31st to part time. During this practical training she was employed as an architectural assistant working on the following project:

"house 9" - living and ateliers, Berlin (LPH 5-7)

- tender for windows, details 1:20 - 1:5
- development of the detail for the canopy
- detailed bathroom planning
- drawing and editing details - facade/windows/balconies
- research and planning of the ceiling boarding for fair faced concrete
- design of the fair faced concrete (board formwork, anchor holes) for the facade and interior walls
- interior elevations (drywall installation, electrical, furniture...)
- preparation of drawings and documents for the tender specifications (doors, windows, dry wall installation)
- checking offers, preparing price comparison lists
- development/design of terrazzo floor with intarsia
- brochures

Elena Petkova showed an excellent understanding of all tasks assigned to her and executed them with great care to our fullest satisfaction. She demonstrated an excellent understanding of spatial relations and the ability to quickly analyse complex matters. With her distinctive technical understanding and her excellent abilities in drafting and model-making, her contribution to the project even against high pressure deadlines always was very valuable and productive. She took on far more responsibility than the status of an intern would generally require.

Elena Petkova joined the office with profound knowledge of both image processing programs and CAD programs and she quickly learned to work effectively with our drafting tools.

Elena Petkova is a bright and resourceful character. Knowing her personality and having seen her professional performance, we can recommend her without any reservation, and wish her luck in her future career.
